

Portable Ozone Generator TROG-605

www.safezex.com | info@safezex.com

Description

Portable Ozone Generator TROG-605 is a lightweight and portable device. It can use for a variety of sterilization and purification treatments. It applies to both air and water, and it operates on the tube type-high voltage discharged gap principle. Designed with stainless steel and therefore can start producing O₃ at a rate of 15 g/h. It performs and has a long service life.

Features:

It is having with good performance and long life

It is equipped with a stainless steel chamber

This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths

It has a lightweight and portable device

It can generate O₃ ranges

It is having with an ozone concentration

Intended with a high voltage ionization

It is both industry and household type

It is an automatic control time type device

It is having with a cool wind of Byo

Specifications :

| | |
|---------------------|----------------------------|
| Application | Both can use air and water |
| O3 range | 15 g/h |
| Overall size | 500 ×160× 220 mm |
| Packing Size | 550×220×270 mm |
| Power | 220V/ 50HZ |
